1. Version History

Initial release was L5P1.

- Released in December 2005.

Changes from L5P1 to L5P2:

- The firmware GP02 was never offered as an update, but many drives already received this update in the production factory.
- Improved writing quality on several media.

Changes from L5P2 to L5P3:

- Released on 5 July 2007.
- Improved writing quality on several media.
- Some discs can be written faster (if the quality allows this), some discs will be written slower as the quality can not be guaranteed at the former high speeds.
- In case your drive identifies itself in Windows “PHILIPS DVDR1668L1”, this name will be changed into “PHILIPS SPD6000L1”.
